

1. Using the allen key bolts and washers to connect two legs with the cross bar and equipment rack as the picture showed.

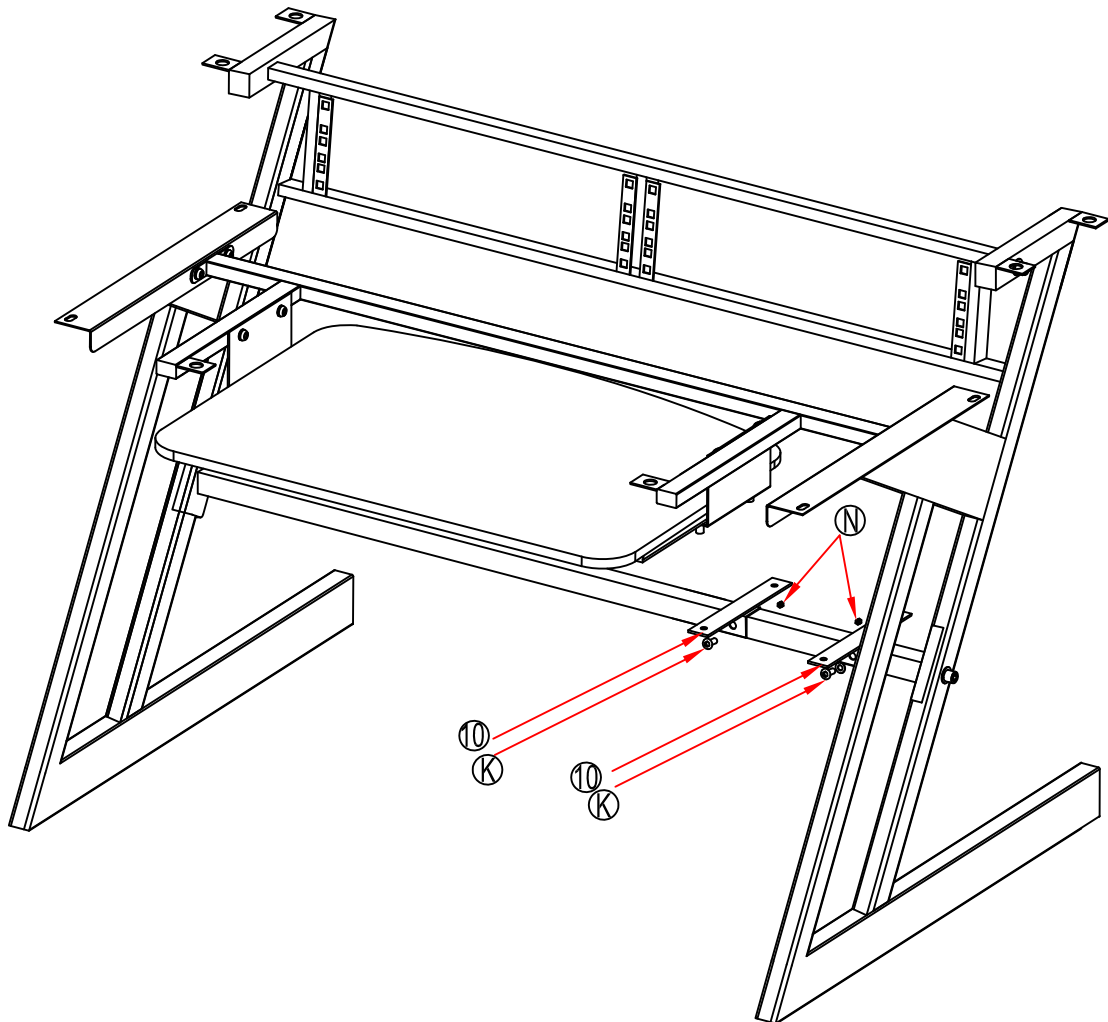

2. Put the 4U rack on the cross bar and tighten the screws.

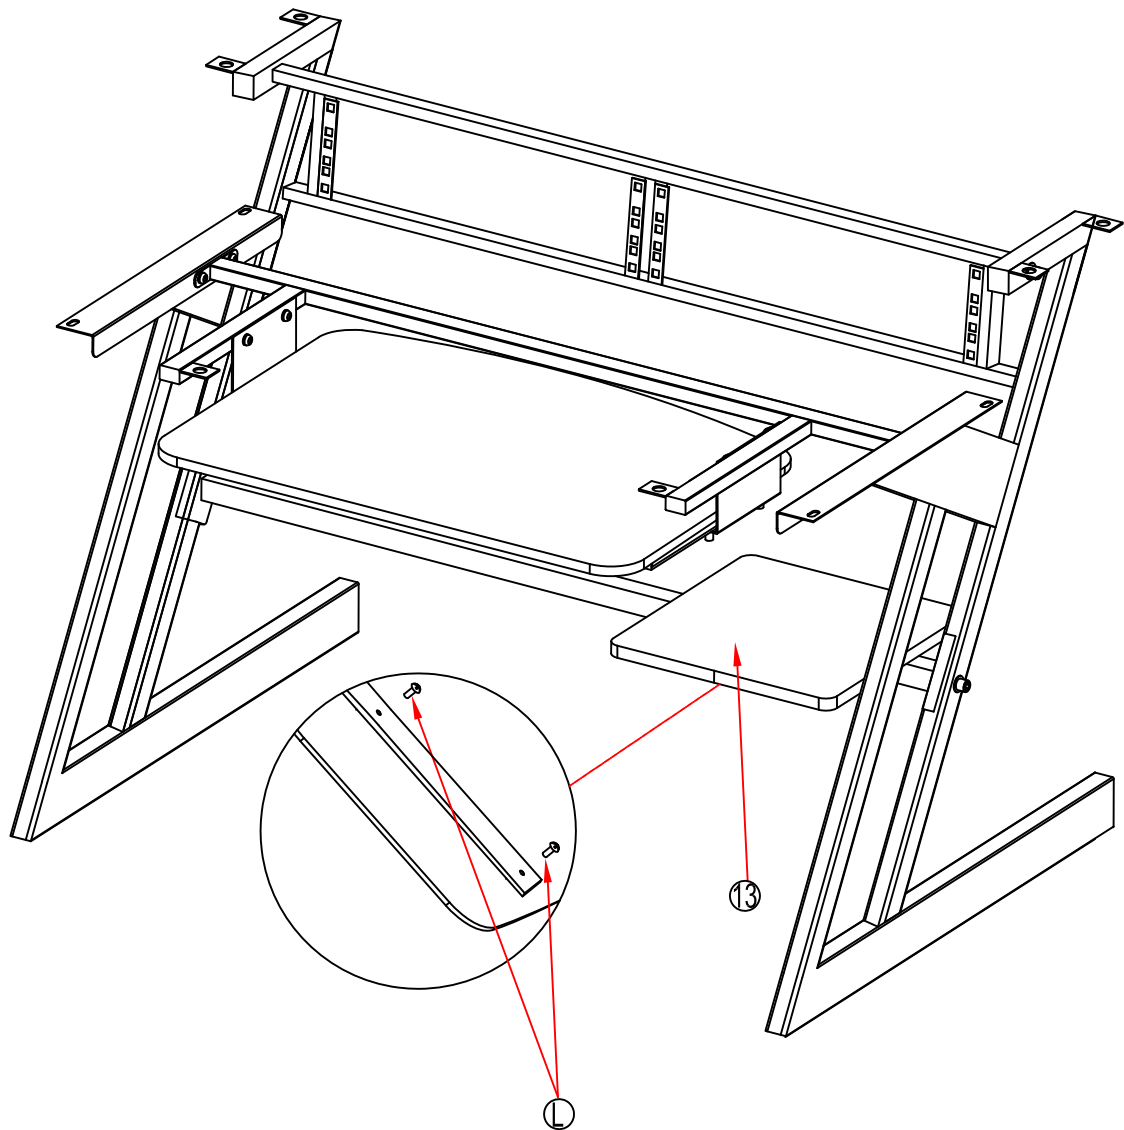

3. Attach keyboard shelf support bracket as above picture and tighten the bolts.

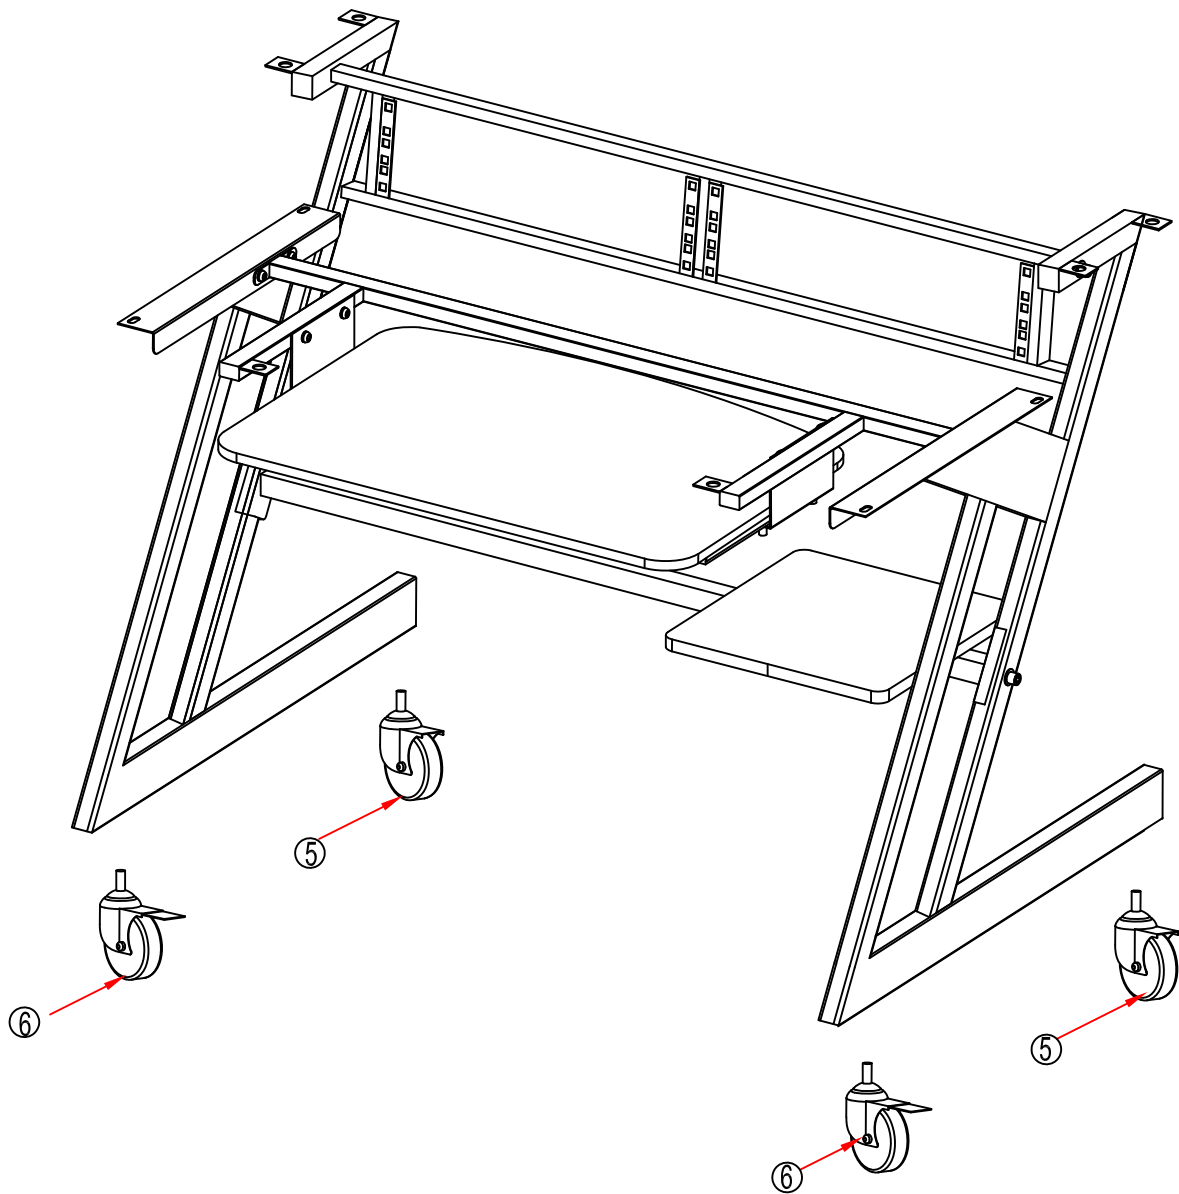

4. Mount the keyboard shelf on the keyboard shelf brackets and tighten the screws.

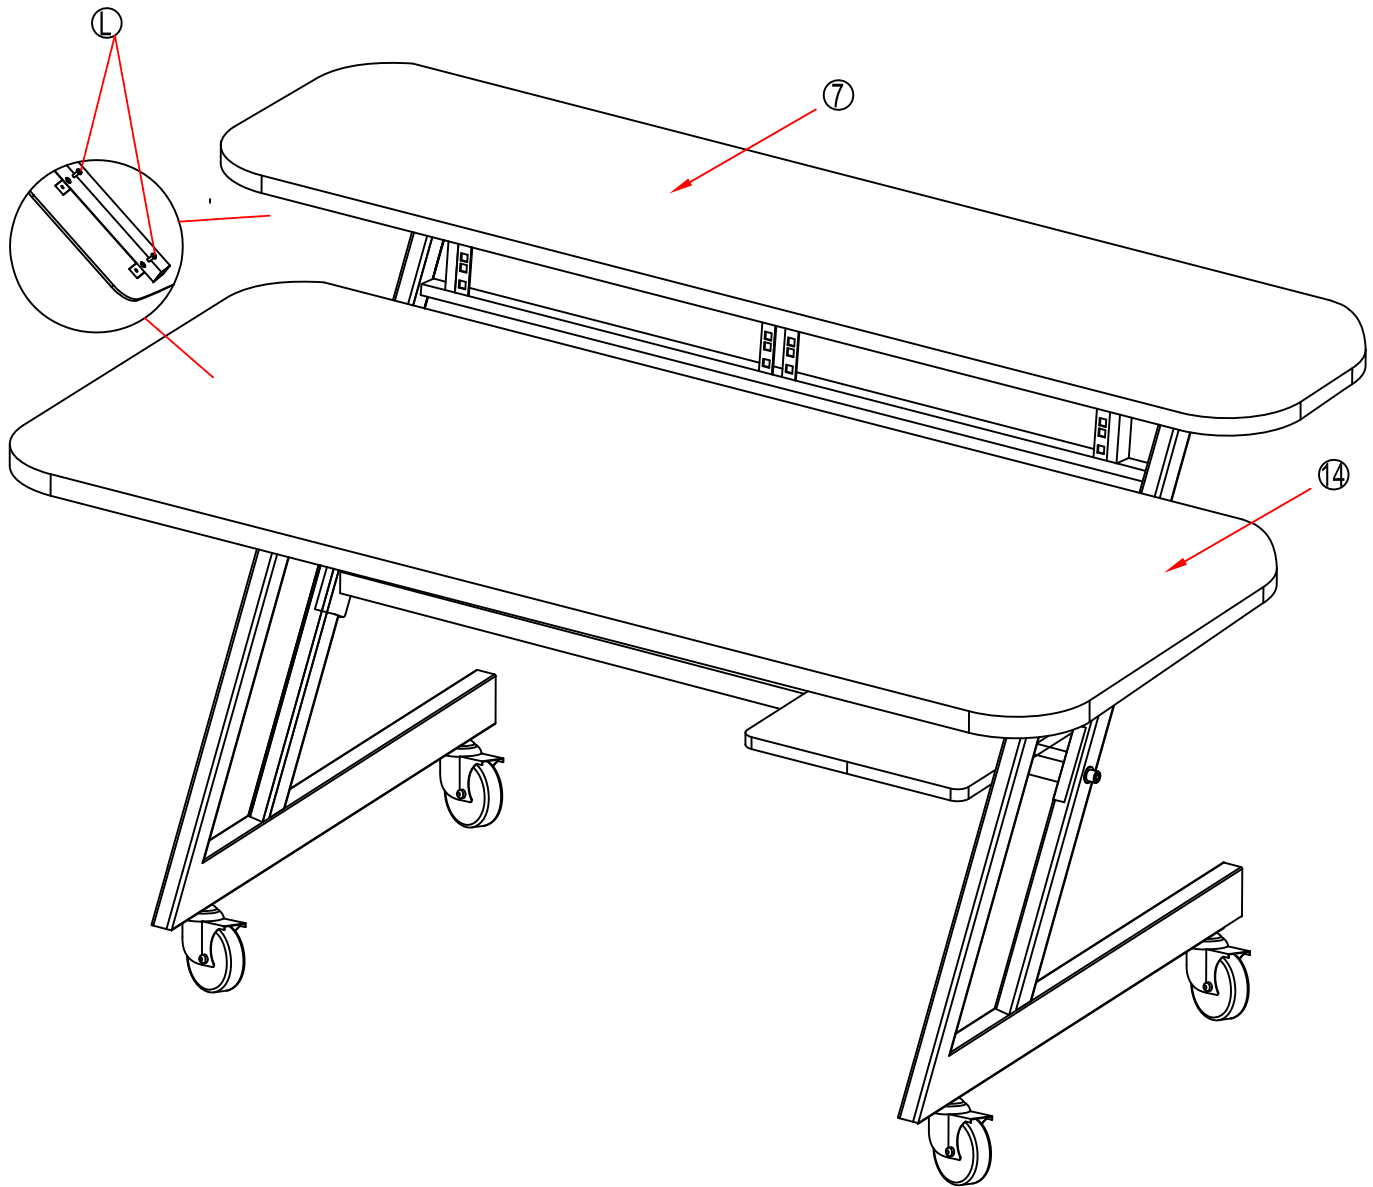

5. Install small shelf brackets on the cross bar.

6. Attach lower shelf onto the brackets.

7. Install the casters under the bottom of the legs (two lockable ones in front, while the others in back)

8. Mount the center shelf and top shelf on support brackets at desired depth with provided wood screws.

Now you have finished the installation of the whole workstation. cheers!
